PROFESSIONAL SUMMARY

Third-year B.Tech Computer Science (Cybersecurity) student with experience in developing web applications, AI-powered solutions, and database-driven systems. Skilled in Python, JavaScript, React.js, Node.js, MongoDB, and SQL with hands-on experience building full-stack applications and integrating AI services. Strong understanding of software development fundamentals, web technologies, database management, operating systems, and computer networks. Seeking opportunities in Software Development, Full-Stack Development, Python Development, and Graduate Trainee roles.

TECHNICAL SKILLS

- Programming: Python, JavaScript, SQL, Bash Scripting
- Frontend: HTML, CSS, React.js, Tailwind CSS
- Backend: Node.js, Express.js
- Databases: MongoDB, MySQL
- AI & Machine Learning: Groq API, Retrieval-Augmented Generation (RAG), Prompt Engineering
- Tools & Platforms: Git, GitHub, VS Code, Vite
- Core Concepts: Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Computer Networks

CERTIFICATIONS

- **Oracle Cloud Infrastructure – AI Foundations Associate** *Oracle (2025)*
- Relevant technical certifications and training in Cybersecurity, Networking, and Cloud Technologies

PROJECTS & WORK EXPERIENCE

AI-Powered Knowledge Assistant (RAG) | *Personal Project* (2025 – Present)

- Developing a Retrieval-Augmented Generation (RAG) application using LLMs, vector search, and document retrieval techniques.
- Implementing semantic search to retrieve relevant information from custom knowledge sources.
- Building document ingestion and indexing pipelines to support efficient information retrieval.
- Generating context-aware responses by combining retrieved knowledge with Large Language Models (LLMs).

Thumblify – AI-Powered Thumbnail Generation Platform | *Group Project* (2025 – Present)

- Developing a full-stack AI-powered application for generating and managing YouTube thumbnails.
- Implemented JWT-based authentication and MongoDB-backed user management.
- Integrated AI services for prompt optimization and automated thumbnail generation.
- Built responsive interfaces using React.js, Vite, and Tailwind CSS.

Adaptive SOC Platform for Intelligent Threat Detection and Incident Response: *Group Project* (2025 – Present)

- Developing an intelligent SOC platform integrating SIEM monitoring, threat detection, and incident response workflows.
- Exploring AI-assisted alert prioritization to improve security operations efficiency.
- Envisions integrating Wazuh and TheHive for centralized security monitoring and case management.
- Focuses on automation, threat intelligence, and data-driven security decision support.

Campus Ambassador (Intern) — *Jenovate* (2026 – Present)

- Represent Jenovate at Parul University, driving student awareness through targeted outreach campaigns across social media platforms
- Recruited interested students for Jenovate programs, managing end-to-end communication, follow-ups, and onboarding coordination
- Acted as the primary point of contact between Jenovate and the campus community at university events and fairs

Technical Event Coordinator — Parul University

(2023 – 2025)

- Coordinated and executed university-level technical and cultural events, managing end-to-end planning and on-ground logistics
- Collaborated with teams of 10+ members across departments to ensure smooth delivery of events within deadlines

EDUCATION

B.Tech in Computer Science Engineering (Cybersecurity)

Parul University, Gujarat | 2023 – 2027 | CGPA: 7.8

Intermediate (Class XII)

Sri Chaitanya Junior College, Hyderabad | 2021 – 2023 | 89%

SSC (Class X)

Sai Siddhartha High School, Hyderabad | 2020 – 2021 | CGPA: 10.0

RELEVANT COURSES

- Database Management Systems (DBMS)
- Operating Systems
- Computer Networks
- Web Technologies
- Python Programming
- Software Engineering
